GD 3040 - DESIGN SYSTEMS

Credits: 3

This intensive course focuses on the principles and elements of brands and identity systems. Students engage in long-term projects that address the significance of brand design, applications, and identity management. Company mission, goals, and objectives are researched, investigated, and presented in detail. Content hierarchy, complex grid systems, typographic hierarchy, text/image integration, and color identification are explored in depth. Students also examine 20th century and contemporary branding systems. Upon successful completion of this course via long-term projects, students demonstrate the conceptual and technical ability to understand, establish, define, and create a complex design system.

Prerequisite: GD 2510 Sign + Symbol

Notes: The required textbook for this course is also used in GD2510.

Exceeding	Meeting	Developing	Not meeting	Program Outcomes	Institutional Outcomes
design concepts evident	Student has translated brand attributes into original design concepts evident through process work.	Student has developed brand attributes into a redimentary design conceptwith limited process work.	Student has not translated brand attributes into original design concepts.	GD-1, GD-4, GD-5, GD-6, GD-7	Cultural Competence, Communication Competence, Design Competence, Critical Thinking
ne stakenolder's needs		The student has shown rudimentary research that implies a developing understanding of the stakeholder's needs and objectives.	The student has not presented any research that interprets the stakeholder's needs and objectives.	GD-3, GD-4, GD-9	Cultural Competence, Design Competence, Critical Thinking
experience into a wide range of design	The student has translated the customer experience into recommended design deliverables.	The student has shown a rudimentary understanding of the customer experience though partially developed design deliverables.			Cultural Competence, Communication Competence, Design Competence, Critical Thinking
choughtful,	comprenensive design	Student has shown a partially or poorly developed design system for the stakeholder.	a comprehensive design		Cultural Competence, Communication Competence, Critical Thinking
	ranslated brand ttributes into original lesign concepts evident horough process work rom start to finish. the student has created a comprehensive research locument that supports he stakeholder's needs nd objectives with professional care and mpathy. the student has ynthesized the customer experience into a wide lenge of design leliverables that elevate he potential of the brand. tudent has created and professionally presented a houghtful, comprehensive design ystem for the	student has created a comprehensive design eliverables that elevate he potential of the brand. Student has translated brand attributes into original design concepts evident through process work. The student has presented research that interprets the stakeholder's needs and objectives with professional care and mpathy. The student has presented and objectives with professional care and mpathy. The student has translated brand and objectives. The student has translated the customer experience into a wide ange of design leliverables that elevate he potential of the brand. Student has translated brand attributes into original design concepts evident through process work. The student has presented and objectives. The student has translated the customer experience into recommended design deliverables. Student has translated brand attributes into original design concepts evident through process work.	Student has translated brand ttributes into original lesign concepts evident horough process work form start to finish. The student has presented a comprehensive research locument that supports he stakeholder's needs and objectives with professional care and mpathy. The student has presented research that interprets the stakeholder's needs and objectives. The student has presented research that interprets the stakeholder's needs and objectives. The student has presented research that interprets the stakeholder's needs and objectives. The student has presented a redimentary design conceptwith limited process work. The student has presented research that interprets the stakeholder's needs and objectives. The student has shown rudimentary research that implies a developing understanding of the stakeholder's needs and objectives. The student has translated the customer experience into recommended design deliverables. The student has shown a rudimentary understanding of the customer experience into recommended design deliverables. Student has developed and predimentary design to redimentary design conceptwith limited process work.	Student has translated brand tributes into original lesign concepts evident horough process work. Student has developed brand attributes into a redimentary design concepts evident through process work. The student has presented a comprehensive research locument that supports he stakeholder's needs and objectives with rofessional care and mpathy. The student has translated brand attributes into a redimentary design concepts with limited process work. The student has presented a research that interprets the stakeholder's needs and objectives. The student has shown rudimentary research that implies a developing understanding of the stakeholder's needs and objectives. The student has shown a rudimentary understanding of the stakeholder's needs and objectives. The student has shown a rudimentary understanding of the customer experience into recommended design deliverables that elevate he potential of the brand. The student has shown a rudimentary understanding of the customer experience into recommended design deliverables.
