

## FS 2280 Ethical Fashion Practices

Credits: 3

This course continues to develop and refine ethical fashion practices addressing circularity in the fashion supply chain. Students will gain comprehensive and measurable insights into the industry's impacts on human rights, labor conditions, environmental responsibility, animal welfare, supply chain transparency, and the effects of consumer behavior. Upon successful completion of this course, students will have the knowledge to question their production and design choices, an awareness of the impacts of those choices, and a mindfulness to address ways to improve the fashion industry.

Students must enroll in this course to meet the requirements of the Sustainable Design Specialization.

Prerequisites: FS 1080 Introduction to Sustainable Fashion Design

Course Learning Outcomes:	Exceeding	Meeting	Developing	Not meeting	Program Outcomes	Institutional Outcomes
Recognize the challenges of greenwashing in relation to lifestyle and consumer behavior.	Student work displayed an excellent degree of recognition of greenwashing challenges.	Student work displayed a satisfactory degree of recognition of greenwashing challenges.	Student work displayed a limited degree of recognition of greenwashing challenges.	Student work displayed no degree of recognition of greenwashing challenges.	FS5	Critical Thinking, Communication Competence, Design Competence, Cultural
Discuss the range of social and environmental impacts of the global fashion industry.	Student work displayed an excellent degree of discussion of social and environmental impacts of the global fashion industry.	Student work displayed a satisfactory degree of discussion of social and environmental impacts of the global fashion industry.	Student work displayed a limited degree of discussion of social and environmental impacts of the global fashion industry.	Student work displayed no degree of discussion of social and environmental impacts of the global fashion industry.	FS5	Critical Thinking, Communication Competence, Design Competence, Cultural Competence
Learn supply chain efficiencies and how to sustainably source, manufacture and design.	Student work displayed an excellent degree of knowledge of supply chain efficiencies and sustainable sourcing, manufacturing and design.	Student work displayed a satisfactory degree of knowledge of supply chain efficiencies and sustainable sourcing, manufacturing and design.	Student work displayed a limited degree of knowledge of supply chain efficiencies and sustainable sourcing, manufacturing and design.	Student work displayed no degree of knowledge of supply chain efficiencies and sustainable sourcing, manufacturing and design.	FS2	Critical Thinking, Cultural Competence, Design Competence
Understand the ethical responsibility behind sourcing, manufacturing and design choices to foster change.	Student work displayed an excellent degree of understanding ethical responsibility behind sourcing, manufacturing and design choices.	Student work displayed a satisfactory degree of understanding ethical responsibility behind sourcing, manufacturing and design choices.	Student work displayed a limited degree of understanding ethical responsibility behind sourcing, manufacturing and design choices.	Student work displayed no degree of understanding ethical responsibility behind sourcing, manufacturing and design choices.	FS2	Critical Thinking, Cultural Competence, Design Competence
